Intelligent Narratives

Quill creates Intelligent Narratives. Automated, relevant communications full of the information that matters most to you—specific to your role, industry or challenge—and written in everyday language. Beyond simply telling you *what* the data is, Intelligent Narratives tell you *why*. So, you can use that knowledge to improve your enterprise.

UPS beats Street 4Q forecasts

AP Associated Press
11h 1

FACEBOOK LINKEDIN TWITTER EMAIL PRINT

ATLANTA (AP) — United Parcel Service Inc. (UPS) on Thursday reported fourth-quarter net income of $1.1 billion, after reporting a loss in the same period a year earlier.

The Atlanta-based company said it had profit of $1.27 per share. Earnings, adjusted for non-recurring costs, were $1.67 per share.

The results exceeded Wall Street expectations. The average estimate of 11 analysts surveyed by Zacks Investment Research was for earnings of $1.65 per share.

The package delivery service posted revenue of $18.83 billion in the period, also surpassing Street forecasts. Eight analysts surveyed by Zacks expected $18.19 billion.

UPS expects full-year earnings in the range of $7.03 to $7.37 per share.

MasterCard tops Street 4Q forecasts

Updated 8:17 am, Thursday, February 1, 2018

PURCHASE, N.Y. (AP) _ MasterCard Inc. (MA) on Thursday reported fourth-quarter earnings of $227 million.

On a per-share basis, the Purchase, New York-based company said it had profit of 21 cents. Earnings, adjusted for non-recurring costs, were $1.14 per share.

The results surpassed Wall Street expectations. The average estimate of 16 analysts surveyed by Zacks Investment Research was for earnings of $1.12 per share.

The processor of debit and credit card payments posted revenue of $3.31 billion in the period, which also beat Street forecasts. Eleven analysts surveyed by Zacks expected $3.26 billion.

For the year, the company reported profit of $3.92 billion, or $3.65 per share. Revenue was reported as $12.5 billion.

MasterCard shares have risen 12 percent since the beginning of the year, while the Standard & Poor's 500 index has climbed almost 6 percent. The stock has risen 59 percent in the last 12 months.

We asked the internet what they thought about:

Climate Change Brexit US Election

Showing 46 of 49 total comments based on toxicity*

- Climate change is happening and it's not changing in our favor. If you think differently you're an idiot.
- They're allowed to do that. But if they act like assholes about, I will block them.
- uneducated bumpkins or willfully ignorant with vested interests
- My thoughts are that people should stop being stupid and ignorant. Climate change is scientifically proven.
- They're stupid, it's getting warmer, we should enjoy it while it lasts.
- I think those people are stupid and short-sighted
- I think its a farce and stinks like a bathroom after 26 beers
- Fools
- They are uninformed or ignorant
- Their opinion, just don't force it down

Zach Seward: Three major trends guide future digital

2017-11-16 Tencent Media Summit

On November 16, 2017, "2017 Tencent Media + Summit" was held in Shanghai World Expo Center. T summit is "Media New Planet." At the summit, Zach Seward, senior vice president and chief executiv Quartz Products, delivered a keynote address titled "The New Mountain: How New Technologies Get Back to the Top." Zach Seward said that the future of digital media, the main trend comes from three a continuous expansion of the possession of mobile devices; the second is the rise of communications; t intelligence. As for the Quartz, its core principles are mainly three aspects, one is in-depth user scenar the design of the road, mobile priority; the third is to remain rational.

Zach Seward pointed out that in most news, its typesetting can be said to be an editing function, the fu newsroom needs typesetting, readers can feel happy, there is live online news, newsroom is not respor typesetting, they are responsible for Report and edit.

The online news and paper news formed a clear contrast, this feeling of use is completely different. A challenge for many news editors, and the digital mindset will become a new trend for news editors.

Exhibit 1: Timeline of AI competing with humans

Creative media/entertainment | Literature | Science

Time to AI disruption		Description
2009	Write sports article	▪ Write a sports article with an independent narrative using data input from the game
2011	Beat human being at Jeopardy	▪ Compete and win against human contestants in the Jeopardy game show
2016	Win in a Go competition	▪ Win the majority of a 5-game Go match
2017	Today	
2020	Compete in World Series Poker	▪ Play poker well enough to win the World Series
2024	Code in Python	▪ Write concise human-readable Python code to implement quick algorithms like quicksort
2026	Write high school essay	▪ Write an essay for a high-school history class that would receive high grades
2027	Generate top 40 pop song	▪ Compose a song that would reach the US Top 40. Output as audio file.
2028	Generate creative video	▪ See a short video and create a new perspective.
2049	Write New York Times bestseller	▪ Write a novel that would make it to NYT best-seller list.
2050	Compete in Putnam Math competition	▪ Perform as well as human entrants in Putnam competition.
2059	Conduct Math research	▪ Autonomously create and prove mathematical theorems

"These technologies have much more in common with power tools than sci-fi superhuman robots—in the hands of a skilled user, they act as a force multiplier in the speed, breadth and scale of content that can be produced."

2017

Join ProPublica to Report on the Technology Platforms Dominating Our Lives

You should also have experience gathering and organizing data and using it to inform storytelling. That means being familiar with computer assisted reporting tools, which could include: SQL and database management; R or other statistical packages; and Python or other scripting languages.

We're also looking for someone who:

- Has the curiosity and knowledge to develop a testable hypotheses that can be asked of a dataset
- Can file a lot of FOIAs and be organized and persistent about following up on them
- Has the patience to clean big datasets, just the same way that they would comb through a stack of FOIA documents
- Knows how to interview people and can engage with technologists on their level during interviews
- Aches to do stories that are both important *and* powerfully told

We know, it's possible *nobody* may have all these skills. You can be a great candidate even if you don't fit everything we've described above. You can also have important skills we haven't thought of. If that's you, don't hesitate to apply and tell us about yourself.
